M:	<p>Course Objectives / Learning Outcomes</p> <p>Upon successful completion of this course, the student will be able to:</p> <ol style="list-style-type: none"> 1. Familiarize students with the history, philosophy and practice of inclusion and the role of supported childcare programs. 2. Understand the significance of the principles of Supported Childcare including: family centred practice, inclusion, individual program planning, community resources and early intervention. 3. Identify community based resources available to support children and families. 4. Understand the coordination of roles involved in transdisciplinary planning. 5. Understand the role of an Early Childhood Educator as an advocate, observer, member of a planning team, and in the development and implementation of curriculum to support the individual needs of children. 6. Understand the causes and classifications of a range of developmental disabilities that may require a child to receive additional support. 7. Identify sources of information (including parents) when researching the needs of a particular child with a developmental disability. 8. Understand the benefits of early intervention and ongoing assessment, evaluation and goal planning used to assist the child in reaching his or her full potential.
N:	<p>Course Content: The following global ideas guide the design and delivery of this course:</p> <ol style="list-style-type: none"> 1. Current practices in the area of supported childcare are best understood within the context of the history, philosophy and past practices from which they have evolved. 2. Supported childcare is based on several principles including family centred practice, inclusion, individual program planning, community resources and early intervention. 3. The resources and delivery of supported childcare varies across communities. 4. Role release and coordination of roles is a necessary part of transdisciplinary planning. 5. Early Childhood Educators play an important role in observation, advocacy, contributions to planning and in curriculum implementation and delivery. 6. Some predictable patterns and support needs can be identified for diagnosed conditions and disabilities. 7. Individual differences will exist among children diagnosed with the same conditions or disabilities as a function of other biological factors, including the timing of growth and development, personality, interests, skills, and experiences. 8. Effective program planning incorporates the child's strengths, particular needs and individual differences. 9. Careful observation under a variety of conditions is essential to accurate assessment and planning. 10. Parents are the best source of information about their child's strengths, condition and particular needs. 11. The child's potential can be maximized when individual plans are effectively implemented and continually re-assessed and revised in consultation with the family and other professionals.
