F:	Calendar Description: This practical course offers students the opportunity to acquire personal care and assistance skills within the parameters of the HCA role. The course is comprised of class and supervised laboratory experiences, as well as supervised practice experience in a multi-level or complex care setting. Through these experiences, students learn to integrate and apply the knowledge, understanding, skills and attitudes they have learned in all other courses in the program. Students are provided with opportunities to develop care-giver skills that maintain and promote the comfort, safety and independence of individuals in facility contexts.
